- Spearheaded cultural events highlighting Korean heritage to boost engagement and participation among 40+ members
- Managed a \$5,000 budget, tracking expenses, processing reimbursements, and allocating funds to support club initiatives

–ACADEMIC PROJECTS–

Fintech Weather Intelligence

Los Angeles, CA

Associate Data Analyst Portfolio Project

Jan 2026 - May 2026

- Engineered a cloud-based analytics pipeline using WeatherAPI, Firecrawl, Snowflake, dbt, and GitHub Actions to automate the ingestion, transformation, and orchestration of real-time weather and financial sentiment data
- Developed an interactive Streamlit dashboard delivering descriptive, diagnostic, and predictive analytics on investor sentiment and trading behavior across major financial hubs, including London, NYC, and San Francisco
- Constructed a Claude Code-queryable knowledge base from 15+ fintech and Investopedia sources to support natural-language financial analysis and identify weather sentiment as a potential alternative data signal for trading models

Valuation and Financial Statement Analysis

Los Angeles, CA

Public Company Valuation

Aug 2025 - Dec 2025

- Performed a comprehensive valuation analysis of Dutch Bros using discounted cash flow and public comparable methodologies
- Analyzed financial statements and performance drivers to build a DCF model, valuation summary, and a football field chart
- Developed an investment recommendation by synthesizing valuation results and current market conditions
